Introduction	v
How to use this book	vi
Working with the large data set	viii

1 Proof and mathematical communication

1: Mathematical structures and arguments	1
2: Inequality notation	6
3: Disproof by counter example	7
4: Proof by deduction	8
5: Proof by exhaustion	9

2 Indices and surds

1: Using the laws of indices	15
2: Working with surds	19

3 Quadratic functions

1: Solving quadratic equations	27
2: Graphs of quadratic functions	29
3: Completing the square	33
4: Quadratic inequalities	39
5: The discriminant	42
6: Disguised quadratics	46

4 Polynomials

1: Working with polynomials	52
2: Polynomial division	54
3: The factor theorem	56
4: Sketching polynomial functions	60

5 Using graphs

1: Intersections of graphs	67
2: The discriminant revisited	70
3: Transforming graphs	72
4: Graphs of $\frac{a}{x}$ and $\frac{a}{x^2}$	76
5: Direct and inverse proportion	77
6: Sketching inequalities in two variables	79

6 Coordinate geometry

1: Distance between two points and midpoint	85
2: The equation of a straight line	88
3: Parallel and perpendicular lines	92
4: Equation of a circle	95
5: Solving problems with lines and circles	99

7 Logarithms

1: Introducing logarithms	110
2: Laws of logarithms	114
3: Solving exponential equations	118

8 Exponential models

1: Graphs of exponential functions	125
2: Graphs of logarithms	130
3: Exponential functions and mathematical modelling	131
4: Fitting models to data	136

9 Binomial expansion

1: The binomial theorem	147
2: Binomial coefficients	150
3: Applications of the binomial theorem	153

Focus on ... Proof 1 158

Focus on ... Problem solving 1 159

Focus on ... Modelling 1 161

Cross-topic review exercise 1 163

10 Trigonometric functions and equations

1: Definitions and graphs of the sine and cosine functions	166
2: Definition and graph of the tangent function	171
3: Trigonometric identities	173
4: Introducing trigonometric equations	175
5: Transformations of trigonometric graphs	180
6: Harder trigonometric equations	184

11 Triangle geometry

1: The sine rule	195
2: The cosine rule	200
3: Area of a triangle	205

12 Differentiation

1: Sketching derivatives	212
2: Differentiation from first principles	216
3: Rules of differentiation	219
4: Simplifying into terms of the form ax^n	222
5: Interpreting derivatives and second derivatives	224

13 Applications of differentiation		19 Objects in contact	
1: Tangents and normals	233	1: Newton's third law	397
2: Stationary points.....	237	2: Normal reaction force	399
3: Optimisation	241	3: Further equilibrium problems	406
14 Integration		4: Connected particles	410
1: Rules for integration.....	253	5: Pulleys	413
2: Simplifying into terms of the form ax^n	256	Focus on ... Proof 3.....	423
3: Finding the equation of a curve	259	Focus on ... Problem solving 3.....	424
4: Definite integration	262	Focus on ... Modelling 3.....	426
5: Geometrical significance of definite integration.....	265	Cross-topic review exercise 3.....	428
Focus on ... Proof 2.....	278	20 Working with data	
Focus on ... Problem solving 2.....	279	1: Statistical diagrams.....	432
Focus on ... Modelling 2.....	281	2: Standard deviation.....	440
Cross-topic review exercise 2.....	283	3: Calculations from frequency tables.....	443
15 Vectors		4: Scatter diagrams and correlation.....	449
1: Describing vectors	287	5: Outliers and cleaning data.....	455
2: Operations with vectors	292	21 Probability	
3: Position and displacement vectors	298	1: Combining probabilities.....	465
4: Using vectors to solve geometrical problems	303	2: Probability distributions.....	469
16 Introduction to kinematics		3: The binomial distribution.....	474
1: Mathematical models in mechanics.....	314	22 Statistical hypothesis testing	
2: Displacement, velocity and acceleration.....	316	1: Populations and samples.....	486
3: Kinematics and calculus.....	320	2: Introduction to hypothesis testing.....	496
4: Using travel graphs.....	326	3: Critical region for a hypothesis test.....	504
5: Solving problems in kinematics.....	335	Focus on ... Proof 4.....	513
17 Motion with constant acceleration		Focus on ... Problem solving 4.....	515
1: Deriving the constant acceleration formulae.....	346	Focus on ... Modelling 4.....	516
2: Using the constant acceleration formulae.....	350	Cross-topic review exercise 4.....	518
3: Vertical motion under gravity.....	352	Practice papers.....	522
4: Multi-stage problems.....	359	Formulae.....	527
18 Forces and motion		Answers to exercises.....	530
1: Newton's laws of motion.....	369	Glossary.....	592
2: Combining forces.....	373	Index.....	596
3: Types of force.....	379	Acknowledgements.....	599
4: Gravity and weight.....	384		
5: Forces in equilibrium	388		

Contents

Introduction

How to use this resource

Working with the large data set

1 Proof and mathematical communication

1: A reminder of methods of proof

~~2: Proof by contradiction~~

3: Criticising proofs

2 Functions

~~1: Mappings and functions~~

~~2: Domain and range~~

3: Composite functions

~~4: Inverse functions~~

3 Further transformations of graphs

1: Combined transformations

~~2: The modulus function~~

3: Modulus equations and inequalities

4 Sequences and series

~~1: General sequences~~

~~2: General series and sigma notation~~

3: Arithmetic sequences

4: Arithmetic series

~~5: Geometric sequences~~

~~6: Geometric series~~

~~7: Infinite geometric series~~

8: Mixed arithmetic and geometric questions

5 Rational functions and partial fractions

1: An extension of the factor theorem

2: Simplifying rational expressions

~~3: Partial fractions with distinct factors~~

4: Partial fractions with a repeated factor

~~6 General binomial expansion~~

~~1: The general binomial theorem~~

~~2: Binomial expansions of compound expressions~~

Focus on ... Proof 1

Focus on ... Problem solving 1

Focus on ... Modelling 1

Cross-topic review exercise 1

7 Radian measure

1: Introducing radian measure

~~2: Inverse trigonometric functions and solving trigonometric equations~~

3: Modelling with trigonometric functions

~~4: Arcs and sectors~~

~~5: Triangles and circles~~

~~6: Small angle approximations~~

8 Further trigonometry

1: Compound angle identities

~~2: Double angle identities~~

~~3: Functions of the form $a \sin x + b \cos x$~~

~~4: Reciprocal trigonometric functions~~

9 Calculus of exponential and trigonometric functions

1: Differentiation

2: Integration

10 Further differentiation

- 1: The chain rule
- 2: The product rule
- ~~3: Quotient rule~~
- 4: Implicit differentiation
- 5: Differentiating inverse functions

11 Further integration techniques

- 1: Reversing standard derivatives
- 2: Integration by substitution
- ~~3: Integration by parts~~
- 4: Using trigonometric identities in integration
- 5: Integrating rational functions

12 Further applications of calculus

- 1: Properties of curves
- ~~2: Parametric equations~~
- 3: Connected rates of change
- 4: More complicated areas

~~13 Differential equations~~

- ~~1: Introduction to differential equations~~
- ~~2: Separable differential equations~~
- ~~3: Modelling with differential equations~~

14 Numerical solution of equations

- ~~1: Locating roots of a function~~
- ~~2: The Newton-Raphson method~~
- ~~3: Limitations of the Newton-Raphson method~~
- 4: Fixed-point iteration
- 5: Limitations of fixed-point iteration and alternative rearrangements

15 Numerical integration

- 1: Integration as the limit of a sum
- ~~2: The trapezium rule~~

~~16 Applications of vectors~~

- 1: Describing motion in two dimensions
- 2: Constant acceleration equations
- 3: Calculus with vectors
- 4: Vectors in three dimensions
- 5: Solving geometrical problems

Focus on ... Proof 2

Focus on ... Problem solving 2

Focus on ... Modelling 2

Cross-topic review exercise 2

17 Projectiles

- 1: Modelling projectile motion
- 2: The trajectory of a projectile

18 Forces in context

- 1: Resolving forces
- 2: Coefficient of friction
- 3: Motion on a slope

19 Moments

- 1: The turning effect of a force
- 2: Equilibrium

Focus on ... Proof 3

Focus on ... Problem solving 3

Focus on ... Modelling 3

~~Cross-topic review exercise 3~~

- 20 Conditional probability
 - 1: Set notation and Venn diagrams
 - 2: Two-way tables
 - 3: Tree diagrams
- 21 The normal distribution
 - 1: Introduction to normal probabilities
 - 2: Inverse normal distribution
 - 3: Finding unknown μ or σ
 - 4: Modelling with the normal distribution
- 22 Further hypothesis testing
 - 1: Distribution of the sample mean
 - 2: Hypothesis tests for a mean
 - 3: Hypothesis tests for correlation coefficients

Focus on ... Proof 4

Focus on ... Problem solving 4

Focus on ... Modelling 4

Cross-topic review exercise 4

Worked solutions for book chapters

- 1 Proof and mathematical communication
- 2 Functions
- 3 Further transformations of graphs
- 4 Sequences and series
- 5 Rational functions and partial fractions
- 6 General binomial expansion
- 7 Radian measure
- 8 Further trigonometry
- 9 Calculus of exponential and trigonometric functions
- 10 Further differentiation
- 11 Further integration techniques
- 12 Further applications of calculus
- 13 Differential equations
- 14 Numerical solution of equations
- 15 Numerical integration
- 16 Applications of vectors
- 17 Projectiles
- 18 Forces in context
- 19 Moments
- 20 Conditional probability
- 21 The normal distribution
- 22 Further hypothesis testing

Worked solutions for cross topic reviews

- Cross topic review exercise 1
